@sd22

Welcome to Sentinel Drone!

Greetings of the day to everyone!

e-Yantra welcomes you all to the **Stage 1** of the **eYRC 2022-23.**

Hope you are as excited as we are for the first task in this stage - Task 0!

We would also like to welcome you to the Discourse discussion forum that is created for all the selected teams in **Sentinel Drone** Theme so that they can post their technical queries which the Instructors, as well as other teams, can answer.

Use this class named " *eYRC 2022-23: Sentinel Drone (SD)* " to ask your queries related to the tasks.

BUT, before posting anything, you must keep the following few points in mind:

Forum Etiquette

1. Through this platform we are providing you great learning and sharing community and encourage you to help others, but you must remember that at the end of the day, this is still a competition. Any help, solution, post, etc. you provide may or may not give an edge to your competitor.

2. This is NOT a spoon-feeding platform. Before posting any query you must utilize the most powerful tool at your disposal i.e. The Internet !!

Skip to main content

3. Read the provided documents. These documents have been specifically curated for your theme by the Theme Developers, kindly respect their hard work too and do NOT post queries before you have gone through them thoroughly.

4. DO NOT POST same queries again and again, give at least 24 hours for your query to be resolved. Rest assured that we are working hard to solve the same at our end. Post the follow-up queries in the same thread, do NOT create a new post for the same query.

5. Use appropriate tags while asking any query, they have specifically been created for quick accessibility. For example, use tag **installation** if your query is related to that, combine it with tag **task-0** as in the upcoming week your queries will mostly be related to that.
Note: One tag is mandatory in order to post.

6. Before you post a query DO CHECK if there is already a post that addresses the same query. This will not only save your but Instructor's time too.

7. Use proper language and be clear and precise while posting your queries Lastly, **DO mention your Team ID** for the prompt resolution of the queries.

8. Do NOT share anything related to Theme - tasks, resources, codes, images etc. as it is e-Yantra's (IIT Bombay) Intellectual Property.

Your team will be directly disqualified if any such cases are found!!

9. Any foul play/cheating/sharing of codes, solutions etc., be it intentional or unintentional will NOT be tolerated and all teams involved will be disqualified from the competition without any further discussion.

10. Keep your repositories private to avoid misuse or sharing.

11. Most importantly, Learn but have fun while learning!!

> " Also have a look at the **Discourse Forum general guidelines**

Happy Learning & All the Best!

CLOSED ON SEP 13
